PROFILE SUMMARY

Full Stack Developer with 1+ year of experience building production web applications using React.js, Node.js, Django and MySQL. Shipped features across five in-house products, including a real-time video conferencing platform (LiveKit/WebRTC) and an AI-driven hiring portal. Owns features end to end — REST API and schema through to responsive UI and Linux/AWS deployment.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, SQL • **Databases:** MySQL, MongoDB
- **Frontend:** React.js, Redux, HTML5, CSS3, Bootstrap, Material UI
- **Backend & Real-Time:** Node.js, Express.js, Django, REST APIs, LiveKit (WebRTC), WebSockets
- **Cloud & DevOps:** AWS Lambda, S3, EC2, API Gateway, CloudWatch, SNS, Docker, Linux
- **Tools & AI:** Git, GitHub, VS Code, Postman, Excel; ChatGPT, GitHub Copilot, Claude

PROFESSIONAL EXPERIENCE

LANCIERE TECHNOLOGIES PVT. LTD.
Hyderabad, India

FULL STACK DEVELOPER
📅 Jul 2025 – Present

Project: iMeetPro · IEvalx · iMentora · ReSnap · JustInSports **Client:** In-house Products
Role(s): Full Stack Developer **Technologies:** React, Material UI, Node.js, Python, Django, REST APIs, SQL, AWS, LiveKit
Responsibilities:

- Delivered features end to end across five production products — React/MUI front ends, Node.js and Django REST services, MySQL/MongoDB schemas — from requirement to deployment.
- Integrated 40+ REST endpoints with JWT auth, role-based access, pagination and centralised error handling, removing repeated API-handling code across screens.
- Built real-time meeting features on LiveKit and WebSockets: room lifecycle, join/leave signalling, screen share and in-call chat.
- Standardised reusable MUI form, table and dialog components with client-side validation, cutting new-screen build time and keeping UI behaviour consistent.
- Deployed and maintained Dockerised builds on Linux servers and contributed to the AWS architecture (Lambda, S3, EC2, CloudWatch, SNS) behind media storage, notifications and background jobs.
- Diagnosed production defects via CloudWatch logs and API tracing; used Copilot and Claude to speed up code review, refactoring and debugging.

KEY PROJECTS

- **iMeetPro — Video Meeting Platform** (React, Node.js, LiveKit/WebRTC): multi-participant calling with screen share, in-call chat and host controls; built the meeting UI and signalling integration.
- **IEvalx — AI-Powered Hiring Platform** (React, MUI, Django REST, MySQL): multi-round pipeline with AI interviews and ranked candidate results; built jobseeker/employer screens and reporting APIs.
- **iMentora — Student Management System** (React, MUI, SQL): role-based management of students, batches, courses and academic records with full CRUD, search/filter and validation.
- **ReSnap — AI Study-Material Generator** (React, Python, LLM APIs): turns uploaded lecture video/audio into transcripts, structured notes and summaries with async job tracking.

EDUCATION

B.TECH, ELECTRONICS & COMMUNICATION ENGINEERING
Narsimha Reddy Engineering College

📅 2020 – 2024

CERTIFICATIONS

- **AWS Cloud Services — Certificate of Recognition**, Honeywell Student Empowerment Program, Narsimha Reddy Engineering College
📅 June - Aug 2023
